

How to Read a Net-Metering Electric Bill

Your Evergy Central (KS) Net -Metering Bill has TWO Columns of Information:

- **Rate Code 303**
shows how much power is received from the grid
- **Rate Code 325**
shows how much power is pushed onto the grid

These two figures are what Evergy uses to determine how much to bill you, and is summarized on the line labeled "Net kWh billed."

What the Bill Does NOT Show You:

The portion of your solar production sent directly to your home, bypassing the meter. See the graphic on the back to learn more!
