How to Read a Net-Metering Electric Bill

Your Freestate Net -Metering Bill has TWO Line Items:
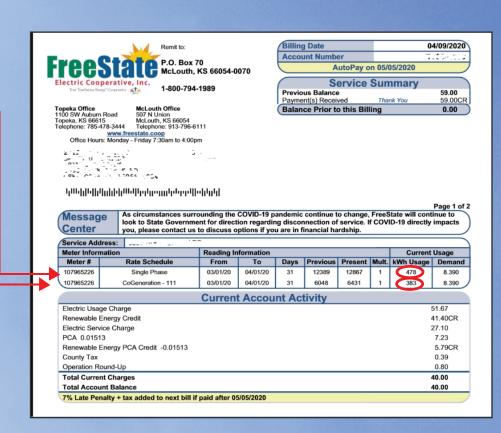

- **Single Phase**

    shows how much power is received from the grid
- **Co-Generation**

    shows how much power is pushed onto the grid

These two figures are what FreeState uses to determine how much to bill you.

What the Bill Does NOT Show You:

The portion of your solar production sent directly to your home, bypassing the meter. See the graphic on the back to learn more!
